

HT turbotech has a new partner !

Â

We now have a new partner which willÂ allow us to build wilder and crazier things! With well over \$5 million worth of fabrication equipment, which includes a 5 and 1.5 Kilowatt laser cutters, several CNC lathes, milling and bending machines, and a casting facility, we can make almost anything.

This means we will now be making underdrive pulley kits, flywheels, sway bars and many other products. We will also have a complete line of fabrication products just like ATP turbo and Vibrant but at reduced prices.

We would like to hear from you, our customers, what other products would you like to see us produce. Let's hear those ideas!
